

POPLAR

SCIENTIFIC NAME: *Liriodendron tulipifera*

DISTRIBUTION AND AVAILABILITY

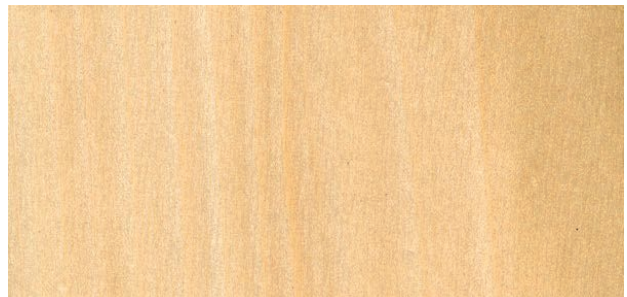

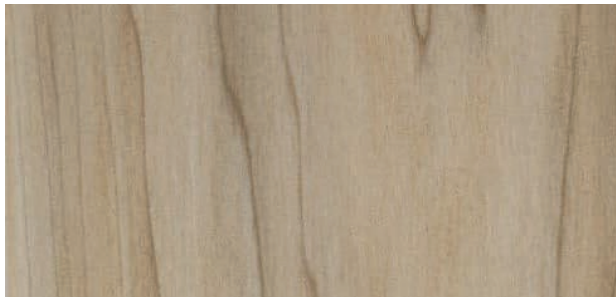

- Eastern North America
- Readily Available

COLOR:

Range Variation

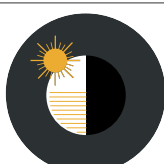

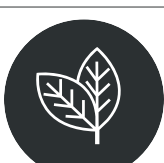

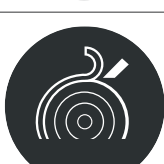

The sapwood is creamy white and may be streaked, and the heartwood varies from pale yellowish-brown to olive green. The green color in the heartwood will tend to darken on exposure to light and turn brown. Can also be seen in mineral stained colors ranging from dark purple to red, green, or yellow, sometimes referred to as Rainbow Poplar.

DISCLAIMER

A single sample may not accurately represent the full range of natural variations to be expected. Due to the inherent properties and characteristics of wood, these samples should be viewed as an approximation of what can be obtained. Some wood species have more natural variance in appearance than others. We have made every effort to make colors as accurate as possible. Colors on screen may vary depending on your screen setting and resolution.
