

WESTERN RED CEDAR

SCIENTIFIC NAME: *Thuja plicata*

DISTRIBUTION AND AVAILABILITY

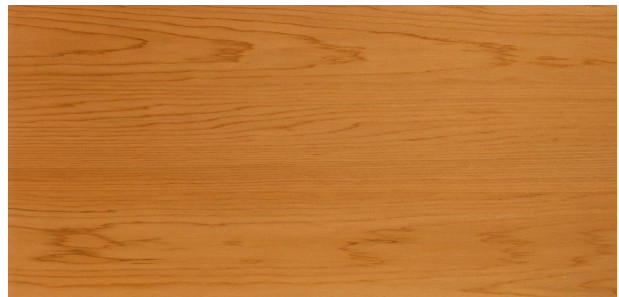

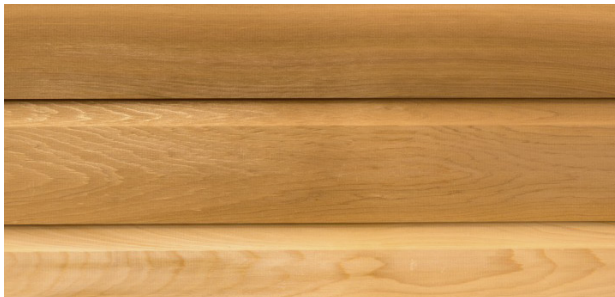

- Pacific Northwest Canada and United States
- Availability Varies By Season

COLOR:

Range Variation

Heartwood is pinkish–or reddish–brown to dark chocolate–brown, often with random streaks and bands of darker red/brown areas. Narrow sapwood is pale yellowish white/blonde and isn't always sharply demarcated from the heartwood. On exposure to light, the color becomes more uniform.

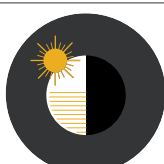

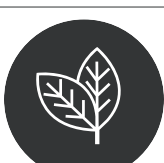

DISCLAIMER

A single sample may not accurately represent the full range of natural variations to be expected. Due to the inherent properties and characteristics of wood, these samples should be viewed as an approximation of what can be obtained. Some wood species have more natural variance in appearance than others. We have made every effort to make colors as accurate as possible. Colors on screen may vary depending on your screen setting and resolution.

LINEA

Species Overview

WESTERN RED CEDAR INFORMATION

		23 lbs/ft ³ (370 kg/m ³)
AVERAGE DRIED WEIGHT		
	GRAIN TEXTURE	The wood is generally straight-grained; has a uniform but medium coarse texture.
	PRICING AVAILABILITY	Moderate. Vertical Grain available at a premium. <i>Varies by Season</i>
	COVERED EXTERIOR RATING	Poor Good Excellent
	PHOTOSENSITIVITY	High Moderate Low
	CONSERVATION STATUS	NT – Near Threatened (IUCN 3.1)
	VENEER OPTIONS	Vertical Grain
