

FLEXIFELT

Introducing **FLEXI**FELT

INEA FLEXIFELT FOLD combine aesthetic appeal with outstanding acoustic performance, boasting a smooth, fabric-like finish. Crafted from PET (Polyethylene Terephthalate) material, this substrate is semi-rigid, lightweight, impact-resistant, and tackable, while maintaining exceptional acoustical properties suitable for both wall and ceiling applications.

FLEXIFELT is composed of 100% non-woven polyester fiber. Remarkably, at least 60% of this material is derived from post-consumer content, specifically recycled plastic beverage containers, rendering the panel 100% recyclable.

In addition to its eco-friendly composition, the FLEXIFELT material exhibits non-hygroscopic qualities, making it resistant to moisture absorption. It is also characterized as anti-microbial, anti-fungal, and free from volatile organic compounds (VOCs) such as formaldehyde. Available in a diverse range of colors, thicknesses, and applications.

LINEA FLEXIFELT

LINEA FLEXIFELT	
-----------------	--

FLEXIFELT PRODUCT SPECIFICATIONS						
Acoustic Felt Type:	100% Polyester Fiber (60% PET-Recycled Fiber, 40% PET Virgin Fiber)					
Fire rating:	Class A (ASTM E84)USA and CAN/ULC S102					
Size:	1225mm x 2800mm (4' x 9' Nom)—Thickness 9mm and 12mm 1200mm x 2440mm (4' x 8' Nom)—Thickness 24mm					
Edge:	Square or Beveled at 15°, 22.5°, 30° and 45°					
Colours:	31					
NRC Rating:	0.40-1.00 (depending panel thickness and mounting options)					
	9mm (3/8")-1900g/m²-0.39lb/ft²					
Weight:	12mm (1/2")-2300g/m² (0.47 lb/ft²)					
	24mm (1")-3500g/m² (0.72lb/ft²)					
Use:	Interior use only					

FLEXIFELT SOLID PANEL NRC

9mm Thickness		12mm Thickness		24mm Thickness	
Frequency/Hz	NRC	Frequency/Hz	NRC	Frequency/Hz	NRC
No cavity	0.35	No cavity	0.40	No cavity	0.60
		Cavity 25mm	0.65		
Cavity 50mm	0.65	Cavity 50mm	0.75	Cavity 50mm	0.75
Cavity 100mm	0.75	Cavity 100mm	0.80	Cavity 100mm	0.85
Cavity 150mm	0.80	Cavity 150mm	0.90	Cavity 150mm	0.90
Cavity 200mm	0.80	Cavity 200mm	0.90		

Note: NRC values illustrated are the average sound absorbtion coefficient from frequency 100 to 4000 Hz

Handling and Storage: FLEXIFELT possesses a semi-rigid structure, requiring careful handling and storage to prevent damage to the product. To ensure the integrity of the material, it is recommended to handle packaging and panels with care, carrying them vertically upright with the assistance of two tradespeople. For optimal preservation, panels should be stored indoors in a clean, dry, cool, and well ventilated environment, ensuring they are kept elevated above the floor or any surface emitting moisture. It is advisable to wear clean gloves during the handling process to prevent any soiling or marking of the product. Caution should be exercised to avoid bending or flexing the panels, as this may result in creasing. To further safeguard the material, it is important to steer clear of exposure to temperatures exceeding 150°F (65°C). Additionally, panels should not be stored in proximity to radiators, steam pipes, or direct sunlight, mitigating the risk of heat-related damage.

Maintenance: Maintain regular cleaning by using a smooth attachment with low suction for vacuuming. We recommend seeking professional cleaning services periodically. Only use upholstery detergent; refrain from using dish washing or laundry detergents. Prior to reuse, ensure thorough drying away from direct heat.

Warranty: Linea Ceiling and Wall Systems offers a two (2) year limited warranty effective from the date of installation, protecting against undue deterioration specifically attributable to faulty materials and manufacturing workmanship.
